Administrative history:

Located at Nacton, Ipswich, Suffolk

Contents:

The records comprise additional deposits of material, to the main Ransomes Collection, TR RAN. They help fill various gaps in the firm's archives, particularly with regard to thrashing machinery, trolley buses and traction engines. The thrashing machinery items include 2 registers of Ransomes' and Rustons' drawings [D01/1 & 2] referring to post World War one drawings and including barcograph transparency numbers; the 2 series of parts registers [MP3/1-5], dating back to the 1860s, one series for general castings, the other for spindles; the first building book of 1879 [MP2/1] and a fine collection of 76 early twentieth century advertising and servicing publications from some different mainly U.S.A. manufacturers. [P2/B1/-76]. The trolley bus and bus body material is the run of order books, 1920-1948 [AD7/1-2], with details of amounts invoiced, though the entries are summary only from 1939 onwards. The traction engine records comprise a copy of the Road Locomotive Society list of engine histories [MP1/1]. Finally there is a collection of c.150 early twentieth century glass negatives [PH1] taken by J. & F. Howard Ltd., Bedford comprising works views of their ploughs and cultivating implements.

DRAWING REGISTER. **TR 2RAN/DO2/1** 1921 (30 Dec) - 1956 (19 Mar)

Loose leaf binder

Contents:

Thrashing Machinery. RSJ nos. RSJ 1001-5603. In order of drawing nos. Format per entry is: no.; scale, type and size of machine; description of drawing; date; draughtsman's initials; tracers initials. Barcograph transparency numbers were added in red or green ink. Ransomes closed down their thrashing machinery department in 1955, transferring the business to Garvies of Aberdeen. Original drawings sent to Garvies at this time are indicated by a red "D" suffix to the drawing no. At the front of the register is a detailed index of all the drawings arranged alphabetically under machinery class, drawing description, page and date. The drawing nos. were subsequently in red ink added for many of the entries.

DRAWING REGISTER. **TR 2RAN/DO2/2** 1913-1929

Bound vol

Contents:

Thrashing Machinery, Ruston & Hornsby Ltd. Nos. RH5985-9599. In order of drawing nos. Format per entry is: date; RH drawing no.; RSJ drawing no.; size and type of machine; description of drawing; tracing or blueprint supplied; remarks. Barcograph transparency nos. were added in red ink. RSJ entered into a merger with Ruston & Hornsby Ltd, in, one outcome of which was Ransomes manufacture in part of Ruston thrashing machinery and steam engines. Various drawing registers were compiled therefore for tracings or drawings supplied and blueprints supplied by Ruston, often with numerous blank entries for drawings not supplied. This particular register is marked no.2, and a note at the end of the register says drawings RH9600 onwards will be found in no.5.

TRACTION ENGINE LIST. **TR 2RAN/MP1/1X** 1866-1940 [*1970's*]

Contents:

Numerical list of Ransomes traction engines produced for the home market. Nos. 1000-44099. The list was originally commenced by A. Duke, Records Offices of the Road Locomotive Society in the 1950s, by extracting details of the engines from Ransomes own registers. Information was then added under each engine number (where known), concerning subsequent owners, road registration, and scrapping. The list in its present form (of which this is a copy) was rewritten in 1976, combining all such additional information, received up to 1976, in a more legible and neat form than the original list with its numerous additions. The result is effectively a series of engine histories, which the R.L.S. continues to maintain. The entries are in successive order of engine number. Format per entry: engine no., registration number, date of supply, engine type, HP, cylinder and other technical details, original owner and subsequent owners, together with (where relevant) dates of new ownership, engine name and date of scrapping. Abbreviations used for engine types are: TE = traction engine, RE = road engine, TR = tractor, SW = steam wagon. [several steam wagons were built for Ruston & Hornsby Ltd. and their respective Ruston engine numbers are also given]. Abbreviations used for cylinder and technical details are: 1s = single cylinder, DC = double cylinder, 2cs = compound, sp = speed, VB = vertical boiler, DW = driving wheel, sprs = springs.

PARTS REGISTER. Thrashing Machinery. **TR 2RAN/MP3/1** 1860's - 1929 (1 Nov)

1 volume

Loose leaf binder

Contents:

General castings. Pattern Mark Nos. R1-6570. In order of mark nos. Format per entry is: date; mark no.; part description, including machine to be used in and remarks; approximate weight-rough and finished, drawing no. The dates are only given regularly from 1882 onwards, R.1155. Barcograph drawing transparency nos., Ruston & Hornsby nos. and further remarks were added in red. Entries coded 'O' in red indicate destruction of patterns, 1919 (17 Feb), whereas [...] in red indicates transmission of original drawings to Garvies of Aberdeen, c.1955. In the rear of the volume is a register of sprocket wheel patterns. Nos. R. 2492-8468, including number of teeth, chain, bore, drawing no. and remarks.

Contents:

General castings. Pattern Mark Nos. 6571-9999. Format as MP3/1 above, plus entry for number of cartings per set. There are hardly any barcograph transparency numbers. After No. 9999 there is a note, "No more numbers to be taken up, see other R. Book". At the rear of the volume is a register of mark nos. for wrought iron driver pulleys, Nos. R1W - R149W, 1935 (26 Jan) - 1954 (23 Nov). Format per entry is: date; mark no.; number off; description; machine to be used in; material; drawing no. Entries coded "D" in red is the general register and "X" in red is both registers indicate destruction of patterns.

INDEX OF THRASHING machinery pulleys. **TR 2RAN/MP3/3** n.d [c1951-1955]

1 volume

loose leaf binder

Contents:

R series of pattern mark nos. Arranged in ascending size of single pulley diameters followed by bell pulleys, and double and triple pulleys. For each different size, there are individual entries in order of mark nos., including diameter, face, bore, drawing no. and remarks. At the front of the index is

a register of master pulley patterns, marks nos. 2R-136R, 1951-1955. Each master pattern then has a list of subsidiary pattern mark nos., including drawing nos., diameter, face, bore, barcograph drawing transparency nos., remarks and date drawn. There is also a register of pulley patterns, nos. 2R-289R, including drawing nos., size, machine to be used in, pulley type and initials.

PARTS REGISTER. Thrashing machinery. **TR 2RAN/MP3/4** 1880's - 1937 (26 May)

Bound vol

Contents:

Spindles. Pattern Mark Nos. T1-3330. In order of mark nos. Format per entry is: date; mark no.; type of spindle; machine to be used in; diameter and width of bearings; middle diameter; weight; drawing no. The dates are only given from 1886, no. T44, onwards. Barcograph drawing transparency numbers were entered in red and there are also correspondence Ruston & Hornsby drawing nos. for certain Ransomes drawings nos. Entries with "X" in red denote destruction of patterns whereas [...] in red denotes transmission of original drawings to Garvies of Aberdeen, C.1955. Weight figures are not given after 1910 and this column was subsequently used to record tracing dates. From 1935 (Jul) onwards the middle diameter figures are replaced by material details.
