

# WELCOME SPRING!

## Make the MERL Springtime Mobile

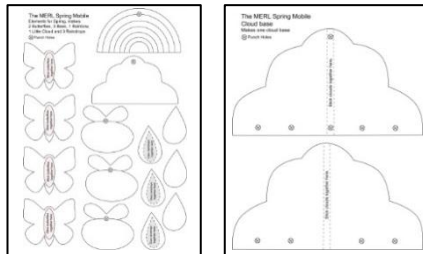

Create this spring mobile to welcome the new season.

Print our templates or create your own design.

### You will need:

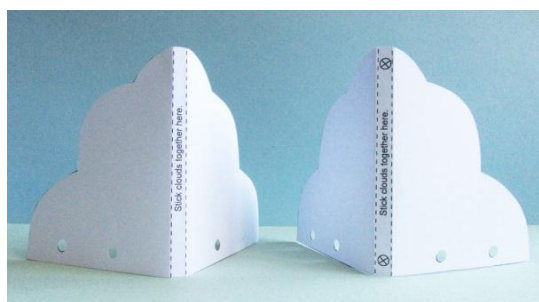

- One sheet of the cloud template \*
- One sheet of the elements of spring \*
- Colouring pencils
- Different colours of wool
- Scissors
- A 5mm hole punch
- Glue

\*120gsm to 200gsm card

### Method

1. Colour in the sheet with the elements of Spring: the butterfly, the bees, the small cloud, the rain drops and the rainbow. Carefully cut out all the shapes. Colour in the other sides of the shapes. Punch holes as indicated- in the bees, the rainbow and the small cloud as indicated by the small circles.
2. To make the 3D cloud base, cut out the two cloud templates, crease along the broken lines, and then glue the two clouds together along the creased rectangle section. Punch holes in the cloud base as indicated by the small circles.

3. Prepare the wool. Measure out 10 different lengths of wool to assemble your mobile. Longest 30cm, the shortest 10cm.
4. Tie wool to the bees, the little cloud and rainbow. Glue two rain drops together with the wool in between. Glue two butterflies together with the wool in between the body section. Then tie all of these to the cloud base.
5. Finally tie a piece of wool to the top of the cloud for hanging up. Have fun making and be inspired by the Season.
