

## Make with the MERL – Footprint Tractor

*Fantastically fun & messy, farm vehicle themed, personalised painting - created through stomping*  
*All you need is paint, paper, scissors, glue and you!*

1. Paint your foot! Or get someone from your family to paint it for you!  
You can use any colour paint, but green is classic tractor.
2. Place your footprint as firmly and carefully as you can onto paper, we did this several times to get the clearest print (and this also helps wear off the paint before hopping to the sink!)
3. As your prints dry, cut out some wheels, pipes and driver cab parts using coloured paper or white paper coloured in – we used an egg cup & small mug for templates with some scrap card from folder inserts.
4. Assemble and glue all your tractor parts & for a finishing touch, add your name to the driver's cab!
