

# WELCOME SPRING!

## Make the MERL Springtime Mobile

Create this spring mobile to welcome the new season. You can use our templates or create your own design.

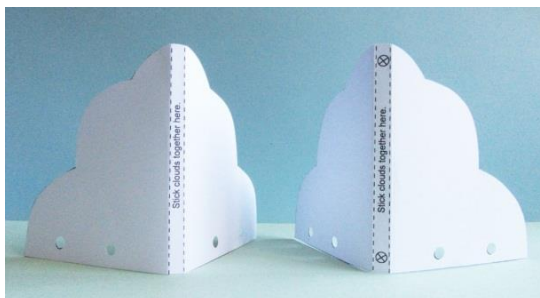

### You will need:

- One sheet of the cloud template
- One sheet of the elements of spring
- Colouring pencils
- Different colours of wool
- Scissors
- A 5mm hole punch
- Glue

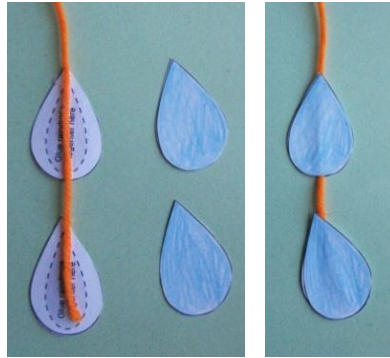

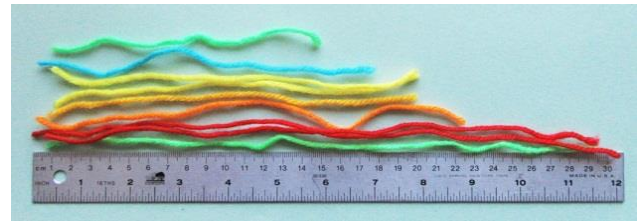

### Method

1. Colour in the sheet with the elements of Spring: the butterfly, the bees, the clouds, the rain drops and the rainbow. Carefully cut out all the shapes. Colour in the other sides of the shapes.
2. Punch holes in the bees, the rainbow and the cloud as indicated by the small circles.
3. To make the 3D cloud base, cut out the two cloud templates, crease along the broken lines, and then glue the two clouds together along the creased rectangle section. Punch holes in the cloud base as indicated by the small circles.

4. Prepare the wool. Measure out 10 different lengths of wool to assemble your mobile.  
Longest 30cm, the shortest 10cm.
5. Tie wool to the bees, the little cloud and rainbow.  
Glue two rain drops together with the wool in between. Glue two butterflies with the wool in between the body section. Then tie these to the cloud base.

6. Finally tie a piece of wool to the top of the cloud for hanging up.
